

Make the chatterbox as follows:

1. Cut carefully along the outer black lines of the chatterbox marked on the A4 sheet until you are just left with the square of the chatter box.
2. Turn the paper face down so that the pictures are facing the table and the paper looks blank. Fold each corner of the square back towards the centre of the paper evenly (folds 1-4) so that you make a smaller square. You should now be able to see each character faced towards you and all the corners meet in the middle.
3. Turn the folded paper over so that you cannot see the pictures and make the same folds again (folds 5-8), following the guidelines. You should now have an even smaller square.
4. Now fold the square to make a rectangle and fold in half again to make a small square, so that you can see the pictures on each side.
5. Unfold the square once. You can now put your index fingers and thumbs inside the paper flaps (which should have the pictures on) and push the chatterbox together, it should now pop up!

To play:

1. Choose one of the 4 outer triangles, and open and close the chatterbox the same number of times as there are letters in the name on the triangle you have chosen.
2. Choose one of the book titles on the inner triangles, and open and close the chatterbox the same number of times as there are letters in the book title that you have chosen.
3. Again, choose one of the book titles on the inner triangles, and open and close the chatterbox the same number of times as there are letters in the book title that you have chosen.
4. Make your final choice of book title and open the chatterbox out, to reveal what your choice says about you!
